## Pre Calc BC

## Pascal's Thm

Name:

1. Construct the conic line using points $a / b_{1-3}$
2. Connect $b_{4}$ to $a_{1}$, label $P$ the point of intersection of this segment with the conic line. Now construct the ray from $b_{1}$ through $P$.
3. Do the same thing with $\mathrm{b}_{4}$ and $\mathrm{a}_{2}$. The two rays should intersect at new point $\mathrm{a}_{4}$
4. Verify your result by repeating with $\mathrm{b}_{4}$ and $\mathrm{a}_{3}$
$a_{3}$.
$a_{2}$.
. $b_{2}$
$\mathbf{a}_{1}$.
.$b_{1}$
. $\mathrm{b}_{4}$
